

Alluvium PK Stimulator is a complex and very concentrated formulation. Alluvium PK Stimulator is an essential requirement for flowering and fruiting plants, enabling them to reach their full potential.

Alluvium PK Stimulator is one of the most concentrated nutrient/biostimulants on the market. Alluvium PK Stimulator contains no artificial PGR's and will assist and increase the flowering/fruiting period.

"Used and tested by the UK's leading horticultural universities".

It is highly recommended that no other nutrient products should be used in conjunction with **The Source** Fertiliser program.

The Source Alluvium PK Stimulator has a balanced NPK of **0-18-20**.

Application rates To be used during the flowering and fruiting stages of the plants life.

SOIL

Use 0.1ml-0.4ml/L of water.

COCO/HYDRO

Use 0.2ml-0.4ml/L of water.

Used as directed this bottle can produce up to:

50,000 L of PK solution for **SOIL**

25,000 L of PK solution for **COCO/HYDRO**

Alluvium PK Stimulator is formulated for **SOIL/COCO/HYDRO**

This unique fertiliser and biostimulant range works as a complete programme to ensure the highest quality and health of plants grown, increasing yield and returns for growers. **The Source** range of fertilisers and additives have been in development for many years and represents the pinnacle of the latest technology available and is the most effective fertiliser and biostimulant combination ever tested with AutoPot.

Suitable for **HARD** and **SOFT** water

Do not drink. Keep out of reach of children

If liquid gets in eyes, wash out immediately with clean water

Shake bottle before use
