

**Delta Boost Stimulator uniquely assists in increasing plant mass and health during the growth stage of a plant. During the flowering/fruiting stages, size, quality, weight and flavour are all dramatically improved.**

Delta Boost Stimulator is formulated from naturally occurring elements. Delta Boost Stimulator acts in two unique ways, firstly it will maintain health within the plant, helping it protect its self from pests and diseases. Secondly by promoting healthy growth during all stages of plant production.

**"Used and tested by the UK's leading horticultural universities".**

It is highly recommended that no other products should be used in conjunction with **The Source** Fertiliser program.

**Contents** A proprietary blend of specific algal extracts with plant-sourced amino acids and glycine betaine with natural plant steroids and their potentiators including polyglucosides.

**Application rates** To be used during the growth, flowering and fruiting stages of the plants life.

#### **SOIL/COCO/HYDRO**

Use 0.5ml/litre of water during the growth stage.

Use 1ml/litre of water during the flowering/fruiting stage.

**Used as directed this bottle can produce up to:**

10,000 litres of Delta solution for the growth stage

5,000 litres of Delta solution for the flowering/fruiting stage

Delta **BOOST** Stimulator is formulated for **SOIL/COCO/HYDRO**

This unique fertiliser and biostimulant range works as a complete programme to ensure the highest quality and health of plants grown, increasing yield and returns for growers.

**The Source** range of fertilisers and additives have been in development for many years and represents the pinnacle of the latest technology available and is the most effective fertiliser and biostimulant combination ever tested with AutoPot.

Suitable for **HARD** and **SOFT** water.

Do not drink

Keep out of reach of children

If liquid gets in eyes, wash out immediately with clean water

Shake bottle before use
