flower stimulator

Application rates

SOIL Use 1.0ml-1.5ml/litre of water dependant on the stage of the plants growth.

COCO/HYDRO Use 1.5ml-2ml/litre of water dependant on the stage of the plants growth.

Used as directed this bottle can produce up to:

250 litres of Flo A solution for **SOIL**

166 litres of Flo A solution for **COCO/HYDRO**

Ideally use an EC monitor to understand the EC of your plain water before you add any fertiliser. Plain water can have differing EC levels. Generally the EC of plain water can range from between 0.1-0.8.

CAREFULLY MEASURE YOUR WATER'S EC BEFORE ADDING ANY FERTILISER OR ADDITIVES.

This unique fertiliser and biostimulant range works as a complete programme to ensure the highest quality and health of plants grown, increasing yield and returns for growers. **The Source** range of fertilisers and additives have been in development for many years and represents the pinnacle of the latest technology available and is the most effective fertiliser and biostimulant combination ever tested with AutoPot.

Suitable for **HARD** and **SOFT** water.

Do not drink

Keep out of reach of children

If liquid gets in eyes, wash out immediately with clean water
